## OUR ADVISORY MODEL

# Strengthening the whole institution

StratCore Analytics helps NGOs, INGOs, donors, public institutions and social enterprises convert governance challenges, audit risks and fragmented systems into accountable, insight-led and resilient institutions.

### Strategy, Performance & Execution

Strategic choices, operating models, transformation roadmaps, scorecards, OKRs and execution governance.

### Fractional CFO & FP&A;

Financial strategy, budgeting, forecasting, cash flow, Board reporting and finance business partnering.

### Governance, Risk & Internal Audit

COSO controls, ISO 31000 ERM, risk-based internal audit, policy architecture and Board assurance.

### Donor Compliance & Financial Systems

Award setup, donor reporting, audit readiness, partner assurance, payroll, procurement and grant controls.

### Evaluation & Impact Measurement

Baseline, endline, satisfaction and KAP studies; mixed methods, ethical data collection and decision-ready analysis.

### Data, AI & Digital Transformation

ERP and QuickBooks strengthening, analytics, Power BI, automation, data governance and responsible AI.

### Financial Literacy & Inclusion

Financial capability, entrepreneurship and MSME training for youth, enterprises and underserved communities.

### Implementation & Capability Transfer

Practical tools, working routines, management ownership and team capability are built into every assignment.

## Our method: Assess - Diagnose - Design - Implement - Build capability - Improve

Assignments combine executive advisory with implementation support. We align people, process, systems, data, governance and impact around the institutional outcome the client needs to achieve.

## SELECTED PROFESSIONAL EXPERIENCE

# Evidence-led delivery in complex environments

The examples below are deliberately anonymized. They demonstrate assignment capability without disclosing confidential client, participant or donor information.

### Finance systems strengthening

Designed a nonprofit-oriented chart of accounts, donor and project tracking, budget-versus-actual reporting, payroll journals, cost allocation and implementation guidance for a donor-funded organisation.

### Project satisfaction evaluation

Designed and delivered a structured satisfaction study using ethical participation, data-quality controls, quantitative and qualitative analysis, and practical management recommendations.

### Governance, risk and assurance

Developed risk-based internal audit, enterprise-risk, control and policy frameworks that connect operational accountability with Board and executive oversight.

### Donor compliance and audit readiness

Translated donor conditions into budgets, control checklists, supporting-evidence requirements, partner-capacity actions and management follow-up routines.

## Donor and institutional context

Experience includes USAID/USG, FCDO, ECHO, UNICEF and other UN agencies, Global Fund, DANIDA, IrishAid, EU, humanitarian pooled funds and multi-partner programmes.

## Collaborative delivery

StratCore collaborates with DataLabs India Solutions Pvt. Ltd. and fruiStrategy on suitable technology-enabled transformation and strategy-execution engagements. Each organisation remains independent and collaboration is applied case by case.

## FOUNDER & LEAD CONSULTANT

# Philiph Bongomin Onyuta

## Strategic Finance, Governance, Risk & Institutional Transformation Executive

Philiph brings 17+ years of international humanitarian and development experience across strategic finance, FP&A, finance business partnering, enterprise risk management, internal audit, donor compliance, institutional strengthening, evaluation and digital transformation.

He works with executive leadership teams, Boards and development partners to improve financial stewardship, strengthen governance and controls, increase audit readiness, manage risk proactively and build practical systems for institutional resilience and sustainable impact.

|                                      |                                                                                                                                                                             |
|--------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Education & professional development | MBA in Financial Management; MA in International Cooperation & Humanitarian Aid; MSc Data Science in progress; Strategic CFO development; FP&A; and QuickBooks credentials. |
| Technical capability                 | Excel, Power BI, Tableau, Python, R and SQL; ERPNext, Maconomy, Aqilla, Navision, SAGE and QuickBooks nonprofit environments.                                               |
| Leadership perspective               | Integrates finance, governance, risk, compliance, operations, data and strategy rather than managing them as separate silos.                                                |
